MAZZINE OMAR

omarmazzine46@gmail.com | +212638037044 | ESSAOUIRA, MOROCCO

PROFILE

Engineering student in Data Science & AI at ENSIASD, with hands-on experience in computer vision and industrial AI applications. Developed a logo detection system using OpenCV during an internship at Saint-Gobain. Currently seeking a 2 month internship in AI, Data Science, or Computer Vision.

EDUCATION

- **Data Science, Big Data, AI Engineering Student** 2025 – 2028
  ENSIASD
- **DUT - Business Intelligence and Data Science** 2023 – 2025
  Higher School of Technology of ESSAOUIRA

PROFESSIONAL EXPERIENCE

- **Internship at SAINT-GOBAIN Sekurit Morocco** April – June 2025
  - Developed a **computer vision solution** to detect car logos on windshields, improving quality control in the production line.
  - Applied **image processing techniques** to identify and match logos with a reference database.
  - Strengthened practical skills in **Python** and **OpenCV** in an industrial environment.

PROJECTS

- **Traffic Sign Recognition using CNN (PFE – EST Essaouira)**
  - Developed a **Convolutional Neural Network (CNN)** to classify traffic signs (43 classes) using the GTSRB dataset.
  - Applied preprocessing techniques including **image resizing (32x32), normalization, and data augmentation**.
  - Designed a deep learning model using **TensorFlow/Keras** with convolution, pooling, and dropout layers.
  - Extended the system to perform **real-time traffic sign detection** using OpenCV.
- **Gas Detection & Alert System (Arduino + Python)**
  - Built an **IoT-based gas detection system** using Arduino and gas sensors for real-time monitoring.
  - Processed sensor data using **Python** and implemented threshold-based detection of hazardous gas levels.
  - Integrated an automated **WhatsApp alert system** to notify users in real time.
  - Ensured reliable and responsive monitoring for safety-critical environments.

TECHNICAL SKILLS & EXPERTISE

- **AI / Data:** Python, OpenCV, TensorFlow/Keras, NumPy, Pandas
- **Web Development:** Django, SQL, HTML, CSS, Bootstrap
- **Tools:** Git, Linux
- **Embedded Systems & IoT:** Arduino, Sensors, Raspberry PI
- **Soft Skills:** Problem Solving, Teamwork, Project Management
  - **Event Manager - IT Innovation Club** 2025 – present
  - **Problem Solver - NOVA Robotics Club** 2023 – 2025
- **Languages:** Arabic (Native), French (Fluent), English (Fluent)
